# The look of real timber **quality & durability**

**MikronWood™** delivers an exciting new dimension to Composite Timber Venetian blinds. The composite used in these blinds is widely used across the USA.

Tested by weather extremes as window & door frames as well as outdoor decking, this product provides a level of toughness not previously seen in the Composite Blind Market.

The SuperCap™ tough bonded surface offers standout quality and durability. This leading edge composite exceeds the A.A.M.A. requirements along with the 7 voluntary additional tests administered through the rigid quality control procedures.

Choose the best features of Timber and Vinyl and **MikronWood™** is the answer.

An impressive tally of features makes **MikronWood™** your obvious choice-

- Stable in high heat environments  
- tested up to 72°C
- Excellent insulator
- Superior dimensional stability
- Scratch, peel, abrasion and fade resistant
- Bonded laminate will not peel or delaminate from high temperatures or prolonged sun exposure
- Use of heat-reflective pigments REFLECT rather than absorb infrared light from solar energy. This makes darker colours a reliable option.
- Suitable for moist conditions
- 5 Year Warranty

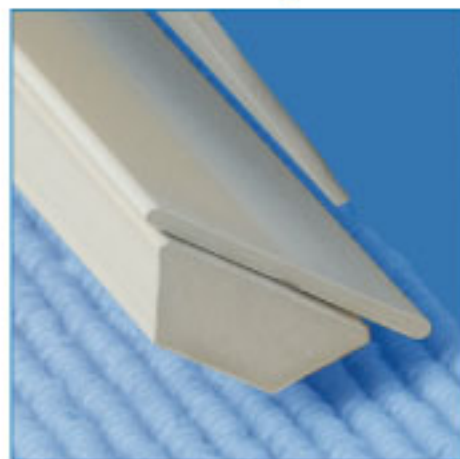

**CARE INSTRUCTIONS:** Dust regularly with a soft cloth or duster. The slats can be wiped over with a damp soft cloth dipped in mild detergent and warm water solution.
