Efficient in **light & heat control**

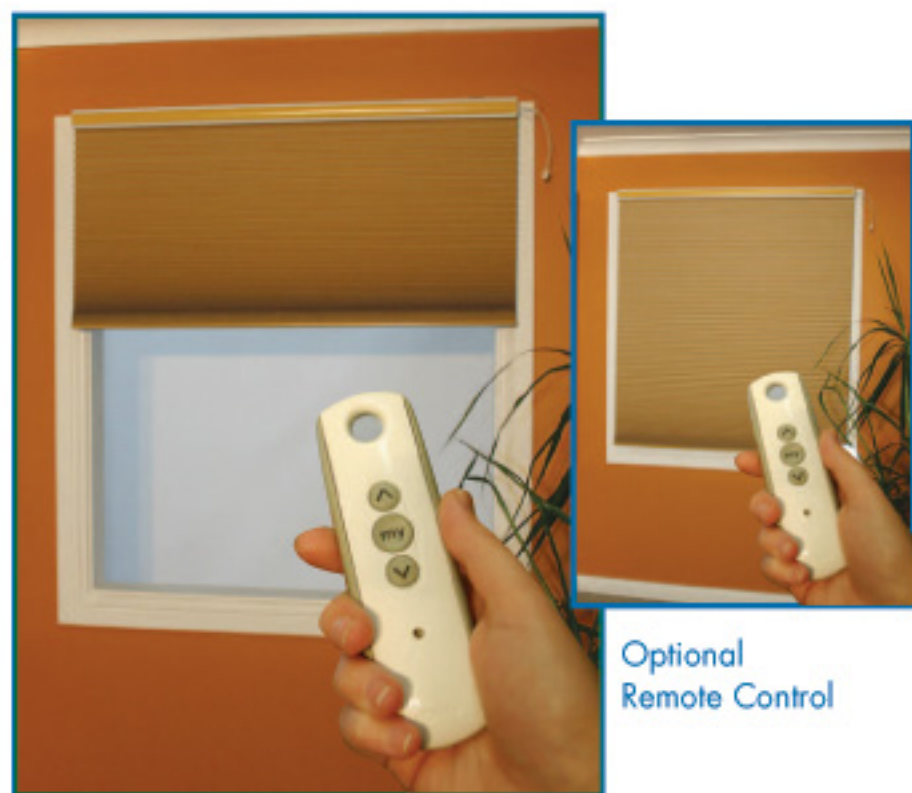

Galaxy cellular pleated shades are lightweight pleated blinds providing gently filtered light without sacrificing your privacy.

Available in translucent polyester fabric and metallised block out fabric. Galaxy is efficient in blocking out the light, heat & cold.

The distinctive honeycomb pleat creates air pockets which act as insulators, reducing noise while keeping you warm in winter and cool in summer.

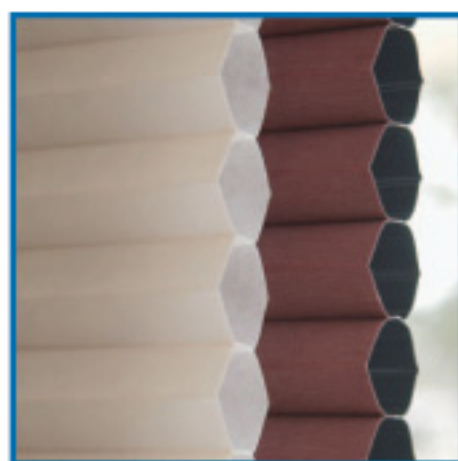

The white backing reflects external solar heat aiding the insulation process.

All blinds are available with colour co ordinated accessories.

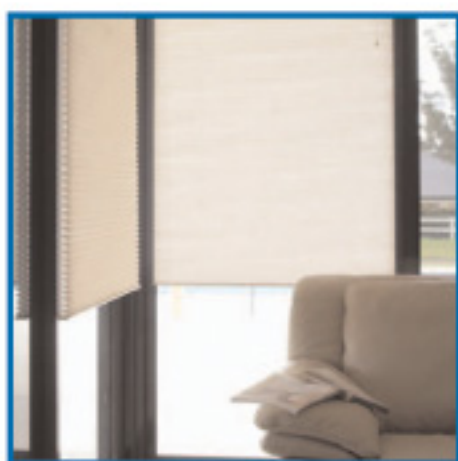

Optional
Remote Control

CARE INSTRUCTIONS: Dust with a feather duster or vacuum using brush attachment. For translucent Galaxy blinds only, remove most smudges & stains by sponging gently with a solution of mild detergent & warm water.
