

vinyl cloth

Quality craftsmanship

Lotus doors are made to a high standard with each door individually made to your specifications. Lotus' vinyl material is backed with a cloth mesh fabric giving it strength and flexibility. A unique double track system makes the door smooth and silent in use and all doors come complete with matching pelmets and hold-back straps.

Extensive colour range

Lotus Folding Doors come in a wide range of attractive finishes including versatile neutrals, authentic wood grains, fine textures and colours to match the latest design trends. In addition you can choose from a number of matching leadpost colours.

Space and energy saving

Lotus Folding Doors are ideal for creating space and making the best use of available areas. Save on your energy bills too by closing off little used areas to conserve heating or air conditioning.

Locks and latches

Lotus doors normally come with a receiving channel into which the door is held closed. Latch, privacy snib and keylock options are described in detail on the back page.

Made just for you

Lotus doors can be made for doorways up to a height of 3m high and almost any width. We can make your door just the way you want it. As a single door, a bi-parting pair or even as a double endpost door, opening both ends.

Commercial applications

Lotus folding doors can be made in a wide range of colours and sizes which makes them useful in many commercial situations. Typical installations are shown below and include offices, meeting rooms and community buildings. Lotus Distributors and retailers are always pleased to help with design and costing queries.
