WHY CHOOSE SYDNEY BLINDS

EXPERIENCE

We've been in business for more than 35 years. And during that time we've earned a reputation for excellence and professionalism. Our expert sales consultants and installers are highly trained, and their focus is always to customise a solution that meets your needs, and to make your experience with us seamless, professional and hassle-free.

FREE MEASURE AND QUOTE

To organise a free measure and quote, just fill out our Free In Home Consultation form at www.sydneyblinds.com.au, or give us a call to book a time and date that work for you. One of our sales consultants will then visit you with a wide range of samples and swatches, measure up and help you choose the best materials for your home.

CHILD SAFETY

We're parents ourselves, so we know how important it is to keep your children safe. That's why all our blinds come with a choice of child-safe operating systems that are designed to ensure there are no choking or strangling hazards. Of course, they still look beautiful and operate flawlessly.

MADE TO MEASURE

Attention to detail is the key. That's why all our products are made to measure; so they suit your needs precisely. This starts with our sales people taking meticulous measurements in your house. Then our factory manufactures to those exact measurements, following a rigorous quality assurance process. And finally our professional installers fit your products at a time and date that's perfect for you.

MANUFACTURED LOCALLY

We're committed to producing quality local products and Australian-made fabrics. We operate our own factory in Prospect, and this is where we manufacture and assemble almost all our products. In addition to supporting local suppliers and employment, this also enables us to control quality, and to deliver only the best to our customers.

ENVIRONMENT

We believe responsible environmental management is non-negotiable. So wherever possible, we source our timber from forests that are managed by the Forest Stewardship Council. The FSC® logo on our products certifies the source. Our Sun Select White Teak, for example, is FSC® certified.

ROLLER BLINDS

SIMPLE & STYLISH

Roller blinds give your home a clean, modern appearance. At the same time, they're one of the most practical solutions for managing light, heat, cold and privacy.

And they're especially useful if you don't have much space. Unlike curtains, they take up almost no room (either up or down), so they're perfect for your busy kitchen or bathroom.

You can choose from a huge range of fabric textures and colours too, from the best fabric suppliers in Australia and around the world. Fabrics designed specifically for Australia's strong sun and damaging ultra-violet light, making them extremely long-lasting and durable.

Importantly, many of our roller blind fabrics are available to match products in our other blind ranges. So your window coverings integrate seamlessly, right through the house, even when you need different window furnishing treatments from room to room.

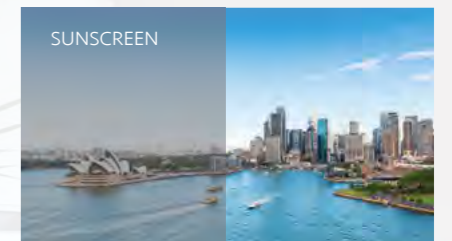

And they're all custom-made in our own local factory, right here in Sydney.

The traditional way to operate roller blinds is with a simple side chain. But with Sydney Blinds & Screens, you can also choose something a little more automated, from a simple power switch to a wireless remote (using radio frequency), right through to a comprehensive home automation system.

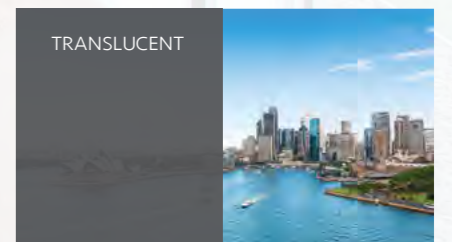

FABRIC OPACITIES

SUNSCREEN

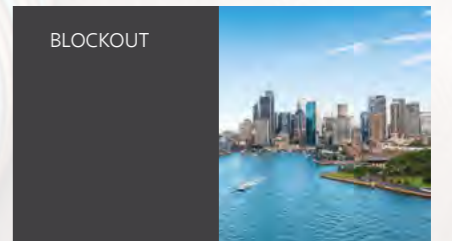

SUNSCREEN: Control heat and light without losing your view, and increase night-time privacy by layering with blackout fabrics.

TRANSLUCENT

TRANSLUCENT: Use translucent fabrics to filter out the worst of the sunlight whilst maintaining day and night time privacy. Translucent fabrics do not allow a view through but bring textures and patterns to light.

BLOCKOUT

BLOCKOUT: When privacy is your goal, blackout fabrics are the answer. Night or day, they'll keep prying eyes out, and they'll also help you insulate your room.

DOUBLE ROLLER

Get the best of both worlds, by combining a blackout blind on the outside with a sheer or translucent blind on the inside. You can pull the blackout blind down whenever you need maximum privacy and UV protection, and leave it up when you don't. The sheer/translucent blind gives you soft, diffused light during the day, and privacy at night, without impeding the cool summer breeze.

- Fabrics available for all companion products
- Easy to clean: most fabrics are soil- and stain-resistant, and can simply be wiped clean
- Options available for wet areas like bathrooms and kitchens
- Flame retardant, blackout, dim-out and glare reduction fabrics available

MOTORISED BLINDS

Normal window blinds have cords hanging down, which are a dangerous hazard for kids. But you don't have to have cords. For your kids' safety and your peace of mind, you can opt, instead, for a motorised blind, that's cord-free and perfectly safe for your little ones.

Of course, they're not just safer, they're also a lot more convenient. You can easily open and close all your blinds or shades at the same time, with just the touch of a button. And they all close perfectly positioned and perfectly aligned. No more tangled chains and cords, and no more struggling with large or hard-to-reach windows.

CONVENIENCE

With the simple touch of a button, you can move your blind or curtain to whatever position you like. You can also add sensors and timers so your products work for you even when you're not at home.

ENERGY EFFICIENCY

Reduce your energy usage by controlling the amount of heat and light entering your home. Keep your home cool in summer by reflecting the harsh heat of the sun, but allow it in during winter to enjoy natural warmth and light.

QUIET AND DISCREET

Somfy's world-leading motors are fully concealed inside the tube of the blind. With the simple press of the remote control, you'll enjoy create the ambiance you desire, and your guests will be impressed with the quiet sophistication of your automated system.

LONGER LIFESPAN

Manually operated blinds often end up being damaged by excessive force and improper use. Somfy's smooth and controlled operation ensures both maximum functionality and a longer product lifespan.

SAFETY

Loose cords and chains are a danger to young children. With Somfy automated blinds and curtains, the cords and chains are completely removed, providing peace of mind for you and a safer environment for your kids.

VERTICAL BLINDS

MAKE IT VERSATILE

For the perfect blend of privacy, light control and style, take a look at our range of vertical blinds.

The crisp, sleek simplicity and modern lines of Vertical blinds from Sydney Blinds & Screens will complement any decorating style. Choose from our extensive range of durable, low maintenance fabrics in exciting new-season colours, textures and patterns.

Made to measure, Vertical blinds are a great choice for controlling the direction and amount of light coming into your home.

- Economical solution for large windows, particularly sliding doors
- Compliments other blind types
- Can be made to fit sloping windows
- Range of blade widths available - 89mm, 100mm & 127mm
- Match your drapes with a coordinated track/pelmet, with or without fabric insert
- Chained, chainless and sewn in bottom weight options available

CHAINED BOTTOM WEIGHTS

CHAINLESS BOTTOM WEIGHTS

SEWN IN ALL SIDES (Optional extra)

PANEL GLIDES

KEEP IT PRACTICAL

The panel glide blind is an innovative shading solution for larger windows and patio doors. Designed as a modern alternative to vertical blinds, the panels move effortlessly through multiple channels, making them light and easy to operate.

Panels look fabulous in both contemporary and traditional interior design schemes, and are also stunning as a stylish room divider. At Sydney Blinds & Screens, we have a wide range of panel glides, available in an array of colours and designs.

But they're more than just stylish and easy to use. They're also exceptionally effective for controlling the amount of sunlight entering your home.

You can choose your preferred panel size too. From 300mm right up to 1,000mm, and they can be free-floating or connected, and can stack left or right when opening (or both).

- Can be used as a room divider
- One-way draw or centre-open
- Use with roller blind fabrics for continuity throughout your setting
- Simple wand control
- 3, 4 and 5 channel track options, and up to 9 individual panels
- Velcro allows for ease of fabric attachment & detachment
- Change fabric easily if your room decor changes

©Jniline Australia 2015

ROMAN BLINDS

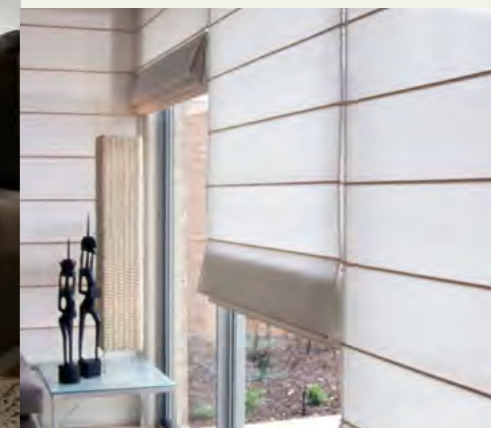

Are you looking for a more relaxed style of window furnishings? The casual simplicity of our Roman blinds allows them to fit into any setting, making them one of our most popular products. More detailed than a roller blind, they gather softly as the blind is opened. An understated style that's reinforced by the soft linens and cottons they're often made from.

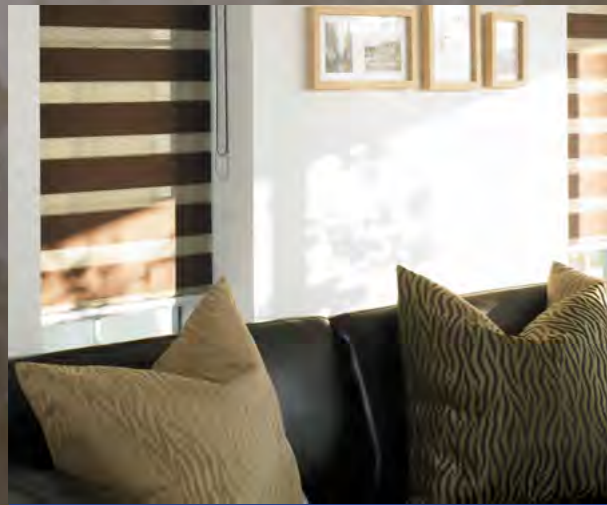

Alternatively, Roman blinds can be combined with other blind styles, such as roller blinds, to create a more tailored, layered, warmer look. Available in light-filtering or blockout fabrics with different batten applications, these shades can capture and complement any intended style.

KEEP IT CASUAL

- Ideal solution for a genuinely cosy, layered look
- Light and easy to operate
- Customise with chain control for larger blinds

LUMEN BLINDS

BE IN CONTROL

Changing your window furnishings can be one of the quickest, easiest and cheapest ways to spruce up a room, particularly if you choose Lumen blinds.

Cleverly designed to operate much like a roller blind, Lumens are simple to use, and because their fabric combines translucent and opaque horizontal strips, layered at the window, you gain better control over the balance of light and privacy.

Each blind comes with a control chain that moves individual translucent and opaque strips past each other. The more translucent strips you leave exposed, the more filtered light you let in. It's a revolutionary design that makes Lumen blinds perfect for letting in the light you want without compromising on privacy.

- Contemporary design provides a striking look
- Stunning alternative to the classic venetian or roller blind
- Combines opaque and translucent fabrics
- Available in a beautiful range of fashion shades

CELLULAR BLINDS

EFFORTLESSLY BEAUTIFUL

PORTRAIT BLINDS

With rich materials, and an even richer history, our Portrait range is suitable for any type of room or window shape. You can select a sheer fabric and a room-darkening fabric, for the ultimate in looks and flexibility. Available in almost any size and specialty shape, while it's perfect for ordinary windows, it's equally at home in arches and irregular windows. Plus you can customise it to suit your décor.

- Day & night shade
- Specialty shapes
- Skylights and sloped windows

GALAXY BLINDS

Galaxy blinds are comprised of a distinctive honeycomb design that capture pockets of air. These pockets of air reduce noise and also provide insulation, helping you keep your home warm in winter and cool in summer. And naturally they also help you lower your energy bills. Choose from single or double cell for your unique design and energy efficiency needs.

- Available in single and double cells
- Top-down and bottom-up option available

ALLURE BLINDS

Allure honeycomb shades allow you to design the light flow specific to the location, by choosing either a semi opaque or room-darkening fabric. Both are durable and water repellent, and both provide insulation, privacy and sound absorption benefits to the window.

Unlike traditional fabrics, which are woven, our Allure honeycomb shades are spun by water jets. This increases the fabric's strength and durability. Control options include cordless, and cordless top-down bottom-up, both of which are child safe.

CORD FREE OPERATION FOR CHILD SAFETY

SEMI-BLOCKOUT

BLOCKOUT

VENETIAN BLINDS

SIMPLE & SLEEK

ALUMINIUM VENETIAN

Aluminium Venetian blinds are still one of our most popular window furnishing styles and with good reason. They offer great flexibility and functionality, and make it easy for you to filter incoming light, or block it out completely.

Durable, efficient and economical, modern venetians are also decorative. You can choose from a wide range of colours, to suit any application. And because you can simply wipe the aluminium slats clean, they're ideal for your kitchen and bathroom.

TIMBERSTYLE VENETIAN

Timberstyle Venetians give you the beautiful organic appearance of timber, as well as the low-maintenance convenience of man-made materials. Not to mention neat and uniform practicality.

Manufactured using polystyrene, these elegant blinds are water-resistant, durable and easy to clean, making them an ideal solution for kitchens and bathrooms and an excellent value for money.

TIMBERLOOK VENETIAN

Create a relaxed and welcoming ambiance with our Timberlook Venetian blinds. Made from man-made materials, these handsome blinds bring natural warmth to any room, and create an inviting atmosphere in your home.

They're versatile too. You can choose from a classic range of colours, all have excellent grain and colour consistency, and will blend effortlessly into contemporary or traditional homes.

TIP: To capture a 'plantation shutter' look with venetian blinds, ask us about our 63mm blade options in one of our popular white shades

MOCKWOOD VENETIAN

A classic and beautiful adornment for any window, our Mockwood blinds complement most decors and are a practical and economical alternative to shutters.

You can choose from a range of colours and finishes, from on-trend painted slats in gorgeous white and mineral tones, to natural wooden tones like the Cedar Grove.

Just as importantly, their consistent colour and grain will stand the test of time at your window. They boast a hard-wearing, water-resistant style, that's perfect for kitchens and bathrooms. And thanks to the high-precision machinery used in their manufacture, all Mockwood venetian slats are exquisitely finished and lightweight. This not only reduces the weight of the blind, but also its stack size.

SHUTTERS

MAKE IT GRAND

Our shutters are designed and manufactured to be durable and sustainable, wherever you use them. Choose from a range of materials, in painted and stained finishes that will complement your colour palette and décor. Indeed, if you use a paint from a major supplier like Dulux, we can even match your shutters to it.

You can also choose your open-close mechanism: either the traditional plantation-style tilt rods (with either centre or offset tilt rods) or the newer 'easy tilt' concealed mechanism.

Our standard shutter blades are available in flat and elliptical profiles, and in widths of 47mm, 63mm, 89mm and 114mm. They're constructed with hand-selected quarter-sawn timbers, reinforced engineered stiles, prescription wood conditioning, mortise and tenon joinery, and multi-step hand finishing. All of these features combine to improve the long-term performance and appearance of our shutters.

Along with plantation-grown timbers, such as Chinese Oak and White Teak, we also offer other shutter materials, including Medium Density Fibreboard (MDF) and ABS Plastic.

We can supply shutters suitable for internal and external applications, custom-made if necessary, for any window shape and size.

All shutters are check-measured by our professional installers prior to manufacture, and are all hand finished to match your exact specifications. We can supply shutters suitable for internal and external applications, custom-made if necessary, for any window shape and size.

SUN SAVER

Our most economical range, Sun Saver shutters are crafted from re-engineered timber harvested from managed plantations. They're treated with a durable polypropylene coating, which provides an extremely robust surface that's stain- and scuff-resistant in a variety of environments.

What's more, UV inhibitors in the coating protect your shutters and home décor from UV rays, and prevent colour fading and extreme damage from the sun.

- Economical and durable option for frequently used areas
- UV inhibitor - Protects your shutter and home décor from UV rays
- Choose from Sun Saver's popular colour ranges that coordinate beautifully with most contemporary paint finishes
- Hinged, sliding and bi folding options available

SUN SMART

Formulated specifically for strength, the resilience of Sun Smart shutters comes from incorporating the same advanced polymer material often used wherever light-weight and strength are required.

SUN SMART PLUS

Sun Smart Plus Shutters are waterproof and suitable for internal wet areas, such as bathrooms, kitchens and laundries.

SUN STYLE

Hand-crafted from Chinese Oak, a plantation-grown timber, Sun Style shutters are an economical and environmentally friendly solution for any window type.

- Ideal for bedrooms or lounges
- Environmentally friendly - can be re-harvested
- Wide range of painted and stained finishes
- Specialty shapes available
- Natural wood and painted finishes

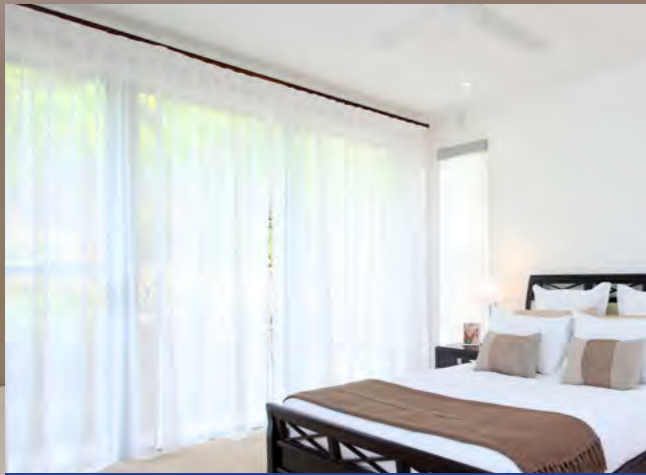

SUN SELECT

Our Sun Select range is crafted from top-of-the-line White Teak hardwood, the finest quality timber, which is not only dimensionally stable, stronger and finely grained, but also eco-friendly.

As with all our styles, Sun Select shutters can be tailored to your needs. You can choose the finish (natural wood or painted), the louvre width, and the hinge colour that best suit your application.

- The perfect way to enhance a feature window
- Invisible Tilt : Offers streamlined appearance, tighter closure, easy cleaning and a wider view
- Enjoy wider, unobstructed views - wide panel capability means fewer panels
- Specialty shapes available, including circles, arches, angles and French doors
- FSC® certified - indicates that the product is certified and comes from a well-managed forest

CURTAINS

MAKE IT BEAUTIFUL

For privacy, heat control and draught-proofing, a quality, well lined drape simply can't be beaten. Sydney Blinds & Screens has the curtain range, options and treatments to suit all styles of modern living.

Whether you want a cosy space to curl up in, or a more open and contemporary look, you can find fabrics, textures and tones to suit your style perfectly. Explore with pattern and length to create a look you'll love. Or choose from the latest in 'S' Fold (or ripple fold) or pinch pleated headings, and blockout or sheer fabrics.

They'll match the other blinds in your home too. Even in the same room. A warm pairing with some pleated blinds, maybe? Or team them up with some patterned roller blinds for something a little more eclectic? Or maybe a luxurious combination of curtains and plantation shutters? Our curtains are versatile enough to suit virtually any application.

All our curtains and accessories are hand-tailored in our local workroom - made to measure and to conform to the highest quality standards.

- Choose from traditional floral designs, elegant geometric patterns and wonderfully contemporary plain fabrics
- Add a custom-made pelmet to enhance the look

AWNINGS

CREATE THE ULTIMATE DECK

The awning range at Sydney Blinds & Screens are designed & manufactured to give you practical and attractive solutions for the control of harmful UV light and glare.

We have a wide range of awnings available for many different uses which, depending on the awning type, can be either hand-operated externally or motorised for control from inside your home. Motorised awning control can be via Remote Wireless (Radio Frequency), switch or Home Automation. The awning range selected for sale at Sydney Blinds & Screens are very popular, easy to use & generally affordable.

Popular Awning products available include: Folding Arm, Pivot Arm, Straight drop Cord & Reel, Verandah Straight drop, Standard Automatic, System 2000 Automatic, Multi-Stop Side Channel, and Wire Guide Awnings.

- Fully cassetted for a neat finish
- Choose from a selection of stunning stripes and sophisticated plain designs.
- Recover your older awnings with new high-performance fabrics.
- Add sensors to automatically control your awning and maximise energy savings
- Use your tablet or smart-phone from virtually anywhere to extend your awning (Motorised with Somfy Motors)

FIXED ALUMINIUM AWNINGS

Fixed aluminium awnings offer lasting protection against the harsh Australian heat. They're the perfect application to cover bedroom and living room windows

PIVOT ARM & ROLL-UP AWNINGS

Pivot arm and Roll-up awnings add privacy and offer protection from the heat, keeping your home cool and reducing your energy bill. These styles can be applied to large windows where privacy and heat control is required.

WIRE GUIDE & SIDE CHANNEL AWNINGS

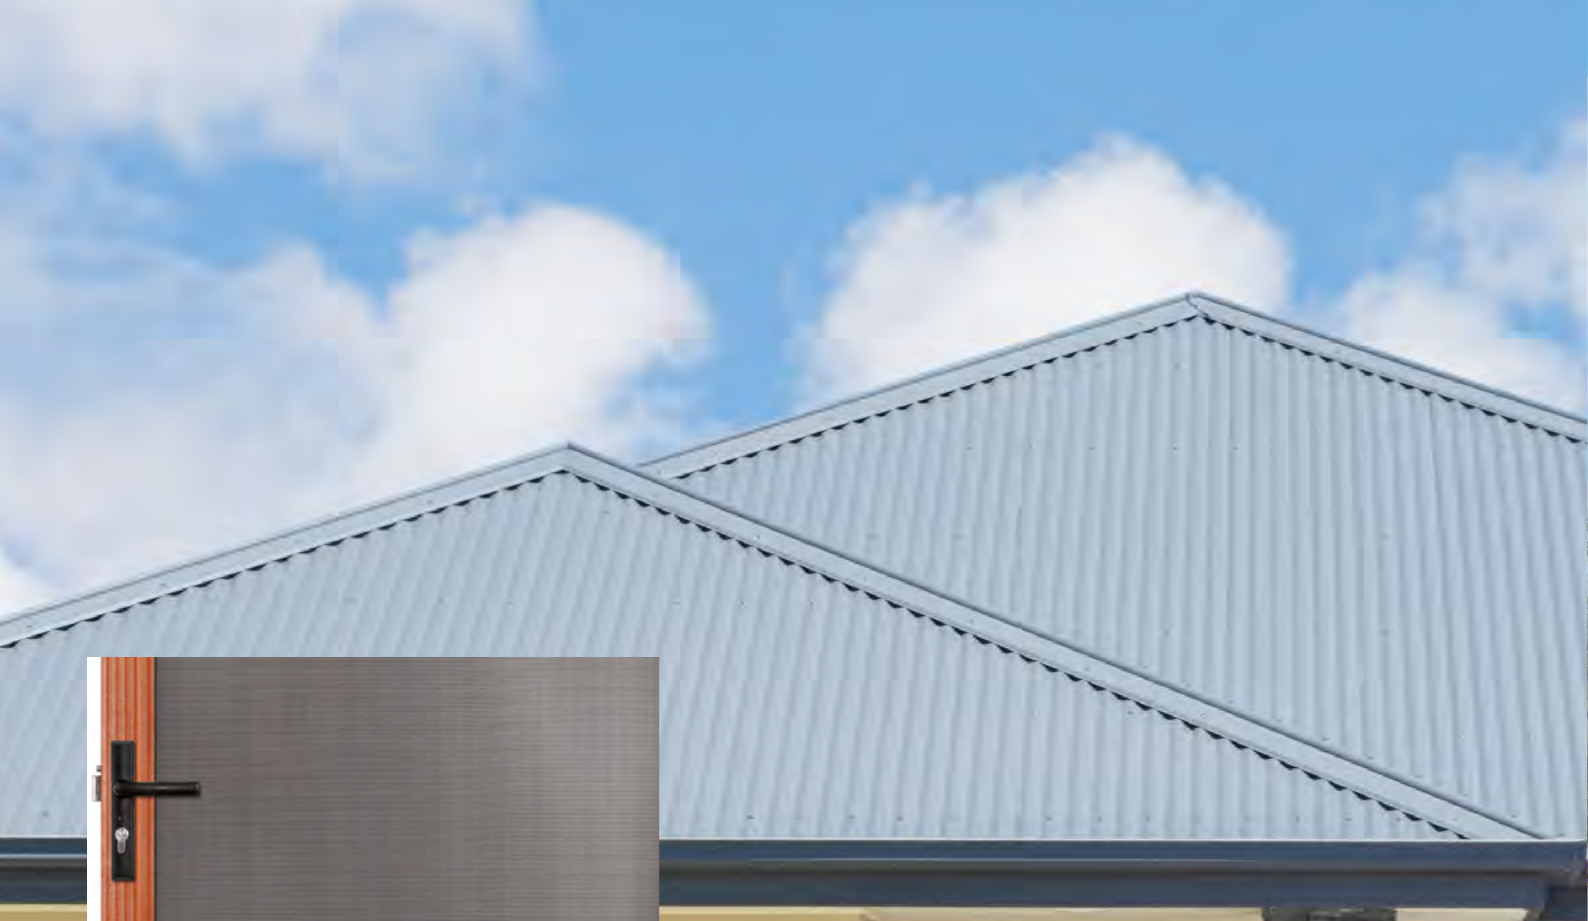

Our Wire Guide and Side Channel awnings are versatile in achieving a desired effect. This type of awning is perfect in controlling privacy when applied to a pergola and helps reduce wind and rain from entering your alfresco dining area.

FOLDING ARM AWNINGS

Folding arm awnings are a necessity for any Alfresco dining area where there is no shade structure in place. Provide shade control over your swimming pool, or eating area to give a truly enjoyable dining experience.

The operating systems for these awnings come from suppliers including Hunter Douglas and Aluxor.

DOORS

At Sydney Blinds & Screens, we supply and fit a range of custom-built safety doors and grilles, in a range of styles and finishes.

Whether you need a screen, safety or highly secure fire-rated door, we have a product to suit your needs and budget. All backed by a professional team of sales people and installers, and all manufactured to your exact specifications and colours requirements.

VISTA DOOR

The Vista Door offers affordability and quality at its best. Manufactured using 0.7mm stainless steel mesh, with a pop riveted fixing system, it provides peace of mind and keeps the bugs out, while still letting the cool summer breeze in.

With a huge range of colours to choose from and assorted applications, choosing a safety door couldn't be easier. Plus, you can get matching safety grilles for your windows, so you have a consistent finish around your entire home.

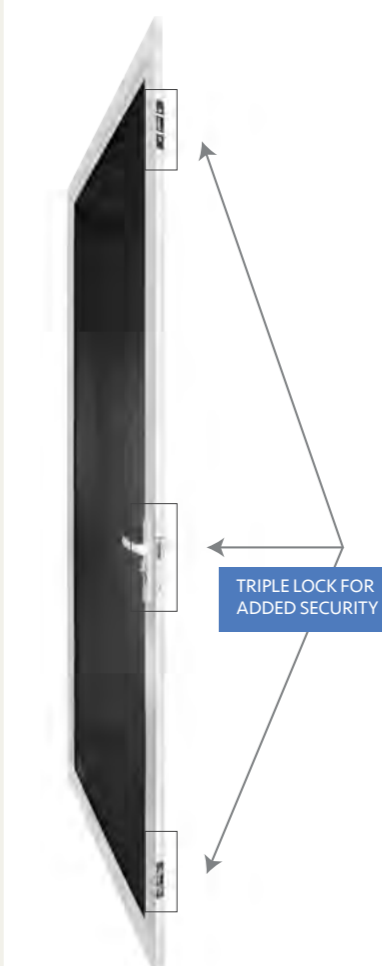

SUNLIGHT SECURITY SYSTEM

The Sunlight Security System (or SSS) combines sophisticated technology, disciplined manufacturing and unmatched quality with an attractive design, giving you the ultimate security, style and peace of mind.

Constructed with a heavyweight extruded aluminium frame, high-strength marine grade 316 stainless steel, and our unique 3-way locking system, it ensures maximum protection of your property and family.

And naturally, because security is our chief concern, the SSS has been rigorously tested to ensure it meets all relevant Australian and Industry Standards (AS5039), and it has passed the following tests:

- ✓ Dynamic Impact Test
- ✓ Lock and Hinge Lever Test
- ✓ Knife Shear Test

FEATURES:

- Triple locking mechanism
- 0.8mm marine grade 316 stainless steel mesh
- Mesh count of 11 x 11 strands per inch (25mm)
- Heavyweight extruded aluminium frame
- Heavy duty corner stakes
- Wedge type fixing system
- Quality Austral locks and handles
- Available in our full range of 20 standard powder coat colours
- Hinged and sliding doors, grilles and safe escapes available

DIAMOND GRILLE

It's not always easy to find a door that performs well, but still looks great. Especially when you're after a genuine security screen. But at Sydney Blinds & Screens, that's exactly what you get. We offer a wide range of security screen designs – something for every application. They're all proven to be secure, and they're custom-made to enhance the design of your home.

Our Diamond Security Grilles are a perfect example. They're manufactured using special tempered aluminium framing, and they meet the requirements of the Australian Security Door Standard AS5039 for greater strength and increased peace of mind.

You can choose from a small diamond design, a 7mm diamond design and a decorative patterned design, all offering the same level of security. Virtually maintenance free, our grilles and frames come in a range of styles and modern colours. Or we can powder-coat yours, just for you, to suit your décor.

COLONIAL CASTING

For a more traditional look, choose from one of many patterned barrier doors.

Ideal for complementing certain styles found in traditional homes, or to add an additional level of safety to your home, our colonial doors can be powder-coated to match any exterior. And we can add side lights to create a uniform look.

Mesh options include: Pet Mesh, DVA mesh and Stainless Steel.

Pet Mesh: perfect for homes with animals

DVA mesh: one-way vision mesh

Stainless Steel: helps to keep insects out

INVISIGARD

INVISI-GARD Security Screens offer an unparalleled combination of security and clarity of vision. Constructed from aluminium and marine grade 316 stainless steel, they also use a unique, patented INVISI-GARD Pressure Retention and Isolation Method, which ensures the door's mesh will defy even the most determined attack. Whether it's from an intruder or corrosion!

INVISI-GARD Stainless Steel Security products don't require screws or any other form of mechanical fixing to secure the mesh into the perimeter frame. As a result, the potential for corrosion through dissimilar metal contact is minimised.

- 10x the strength of the Australian Standard in terms of absorbed energy
- Heavy duty extruded aluminium perimeter frame for extra strength
- The 316 marine grade stainless steel mesh can withstand harsh environments such as coastal or industrial areas
- Clean look with no unsightly screws or other fixings
- All INVISI-GARD hinged doors are fitted with three-point locks and hinges for added security

ALL DOORS HAVE THREE POINT LOCKING

ALL HINGED DOORS ARE INSTALLED WITH THREE HINGES

Clean finish with no visible fixing

Patented INVISI-GARD pressure retention system for maximum security

TESTED AND APPROVED

Tested and approved in accordance with Australian Standards, INVISI-GARD delivers confidence in security. INVISI-GARD Stainless Steel Screens have a wide range of products suitable for the following residential and commercial applications:

- ✓ Hinged Doors
- ✓ Patio Enclosures
- ✓ Sliding Doors
- ✓ Emergency Escape Systems
- ✓ Sliding Windows
- ✓ Pool Fencing
- ✓ Security Screens

DYNAMIC IMPACT TEST: AS5039-2008

The test is performed with a sand and lead filled bag and weighing around 40kg. At impact the bag imparts 100 joules of energy to the panel being tested. The test is repeated 5 times, simulating repeated kicking as the burglar attempts to break into your home.

LOCK AND HINGE LEVER TEST: AS5039-2008

The effects of a jemmy attack against a security screen door or window grille are simulated by allowing a standardised narrow-bladed lever (representing a large screw driver) to be inserted against the locking, fastening and hinging points and a turning force (torque) is applied to those points via the lever.

KNIFE SHEAR TEST: AS5039-2008

This Australian Standard test simulates a knife attack on INVISI-GARD as a burglar tries to cut through the screen. The test aims to recreate the effect of someone attacking your doors with a Stanley knife or similar. INVISI-GARD is able to pass this test thanks to the strength of the 316 Marine Grade Stainless Steel Mesh.

CYCLONE RATED: AS1170.2-2011

One of the toughest tests of strength for a security system is the Cyclonic Missile Impact Test in accordance with Australian Standards AS1170-1989. In this test a 4 kilogram piece of hardwood is aimed at the centre of the security screen and then launched reaching a speed of 15 metres per second or 54 kilometres per hour at the time of impact.

BUSH FIRE TESTING TO AS1530.8.1

The Invisi-Gard system is known to be a robust fire attenuation screening solution and has been proven even further with an Australian first application of a Breezway Altair Louvre window system achieving a BAL40 level compliance.

INVISI-SCAPE SYSTEMS

INVISI-SCAPE Emergency Escape Security Screens offer a simple keyless escape method in the event of a fire or an emergency situation. The need to escape through a window is one that we hope you will never require, however with the INVISI-SCAPE System you have confidence in not only additional security but also the peace of mind of egress in an emergency.

We would like to say a big Thank you to all our suppliers for their ongoing support & contributing to our success
